WORK EXPERIENCE

A10 Networks, Inc.

In Office | Saint John, NB

AI Security Engineer (Co-op)

June 2026 – Sept 2026

- Transitioned to A10 Networks following its acquisition of TrojAI, maintaining core engineering responsibilities while integrating into a 500+ employee organization with new teams, tools and workflows
- Contributed to integrating TrojAI's core products with A10's pre-existing AI Gateway and Firewall

TrojAI, Inc.

Hybrid | Saint John, NB

AI Security Engineer (Co-op)

March 2026 – June 2026

- Built out enterprise AI security products; AI Firewall with browser extension functionality and traditional/agentive Red Teaming systems, delivering production-ready detection and defense capabilities
- Developed and tested production-grade changes within a gRPC based microservice architecture spanning 17+ repositories, diagnosing complex inter-service issues and fixes while maintaining system reliability
- Built internal AWS-hosted dashboard unifying data science workflows and enabling hybrid CPU/GPU test execution across local machines, servers, and devbox environments, consolidating manual Hugging Face usage and replacing external testing tools and scripts with a centralized internal platform

Red Thread Innovations, Inc.

Remote | Toronto, Ontario

Software Engineer (Co-op)

April 2025 – Sept 2025

- Developed and optimized realistic AI avatars in Unreal Engine, animating character rigs using viseme data and ElevenLabs text-to-speech API, with performance improvements via WebAssembly
- Owned and executed end-to-end data modeling for a relational LMS backend, defining tables, schemas and relationships using Miro and Mermaid to establish the primary source of truth for development
- Researched LLM SDKs/APIs and benchmarked models on company-specific coding tasks/practices to guide development of a node-based coding agent and its orchestration harness/environment (CogniGraph)

Full Frame Freelance.

Remote | Rothesay, NB

Full-Stack Freelance Software Developer

January 2025 – June 2025

- Delivered 3 freelance projects: full-stack web app with admin dashboard, two Google Sheets solutions (50K-member community tool and custom Apps Script automations), and Roblox game development

EDUCATION

University of New Brunswick

Saint John, NB

Bachelor of Computer Science, Co-op Program Distinction

Jan 2024 – Apr 2027

- **GPA:** 3.7
- **Honors/Awards:** Dean's List, Fisher Foundation Award (2x), Good Energy Award (2x)
- **Publications:** Published research on a digital twin of UNBSJ parking infrastructure modeling demand and system stress; led to outreach from Transportation & Parking Chair and funded research with UNB CS faculty

Mount Saint Vincent University

Halifax, NS

Bachelor of General Science

Jan 2022 – Apr 2023

- Completed a wide variety of coursework before transferring to UNB's Computer Science program

TECHNICAL SKILLS

- **Languages:** Golang, Java, TypeScript, C, Python, JavaScript, SQL, C++, Assembly, Binary; basics
- **Backend & APIs:** gRPC, Node.js, Express, RESTful APIs, TypeORM, Fly, Zod, Axios, Mermaid
- **Databases:** PostgreSQL (GIN index, tsvector), TailScale, SQLite, MongoDB, Redis, Coolify, Supabase
- **Tools & Tech:** AWS, K8's, Docker, Vite, SourceTree, Git/GitLab, Google Earth Engine, Claude Code

PROJECTS

Project Portfolio: Additional projects and in-depth full project details (repos, tech stacks, challenges, etc.) | [Link](#)

- **Volleyball 4.2 Platform:** Open-source full-stack app for managing teams, stats, and tournaments | [Link](#)
- **UNB Parking Digital Twin:** Parking analytics system using satellite data and predictive modelling | [Link](#)
- **Stats 3D PCA Graphing:** 3D visualization of high-dimensional player stats using PCA for analysis | [Link](#)
